ROZHOVOR SE STAROSTOU MĚSTA MAYRHOFEN

E: My first question is if you are a local?

H: Yes, I am.

P: I would like to ask, how did you get into being a mayor?

H: I had to run an election ...(laughter) I was always interested in politics and especially local politics. I was 10 years in town government and then I became a mayor.

E: How long have you been mayor now?

H: I started last year, and I will be a mayor for another six years.

P: What is your favorite thing about Mayrhofen as a local?

H: I think the landscape. I like to live here, I have never wanted to be anywhere else.

P: Do you ski?

H: Yeah, since I have been 3 years old.

E: Oh really? You must be a pro skier by now?

H: No, no I'm not (laughter)...

P: What is the biggest ecological problem in Mayrhofen? In your opinion.

H: I think the traffic.

E: The emission and stuff, right?

H: Yeah

P: And how are you trying to change it, like do something about it?

H: I'm thinking about changing the timetable of buses and trains. We're also trying to build photovoltaics and get rid of gas.

E: You know this town feels like here is overtourism a lot, I would say. Do you think that the crowds of tourists are somehow negatively or positively affecting this town?

H: I think we can't talk about overtourism because you know, it's all like build for this. We have a main street with lot of shops and lot of people are working here so if we don't have enough guests it could be a problem.
